

Delicious Pizza for Everyone!

PIZZA BOXCAR

@www.linkedin.com/in/nirmal-mehta-47427624b

Hello!

My name is Nirmal Singh Mehta, and I've created a project on pizza sales using SQL. I've covered three types of questions in it, which we'll see in detail later.

Determine the distribution of orders by hour of the day.

```
SELECT  
    HOUR(order_time), COUNT(order_id)  
FROM  
    orders  
GROUP BY HOUR(order_time);
```

HOUR(order_time)	COUNT(order_id)
11	1231
12	2520
13	2455

Retrieve the total number of orders placed..

```
SELECT  
    COUNT(order_id) AS total_order  
FROM  
    orders;
```

Result Grid	
	total_order
▶	21350

Identify the highest-priced pizza.

SELECT

pizza_types.NAME, pizzas.price

FROM

pizza_types

JOIN

pizzas ON pizza_types.pizza_type_id = pizzas.pizza_type_id

ORDER BY pizzas.price DESC

LIMIT 2;

NAME	price
The Greek Pizza	35.95
The Greek Pizza	25.5

List the top 5 most ordered pizza types along with their quantities.

```
SELECT  
    pizza_types.name, SUM(orders_details.quantity) AS quantity  
FROM  
    pizza_types  
        JOIN  
    pizzas ON pizza_types.pizza_type_id = pizzas.pizza_type_id  
        JOIN  
    orders_details ON orders_details.pizza_id = pizzas.pizza_id  
GROUP BY pizza_types.NAME  
ORDER BY quantity DESC;
```

name	quantity
The Classic Deluxe Pizza	2453
The Barbecue Chicken Pizza	2432
